centres

CHARACTERISTICS OF NSS

- Legal Framework
- Shared Vision
- Strategic Direction
- User Focused and Driven
- Robust and Dynamic
- Effective Leadership and Management
- Data Quality
- Coordination, Networking, Data and Information Management and Flow

Legal Framework, Shared Vision, Strategic Direction, User Focused and Driven

Robust and Dynamic, Effective Leadership and Management, Data Quality

Integrity

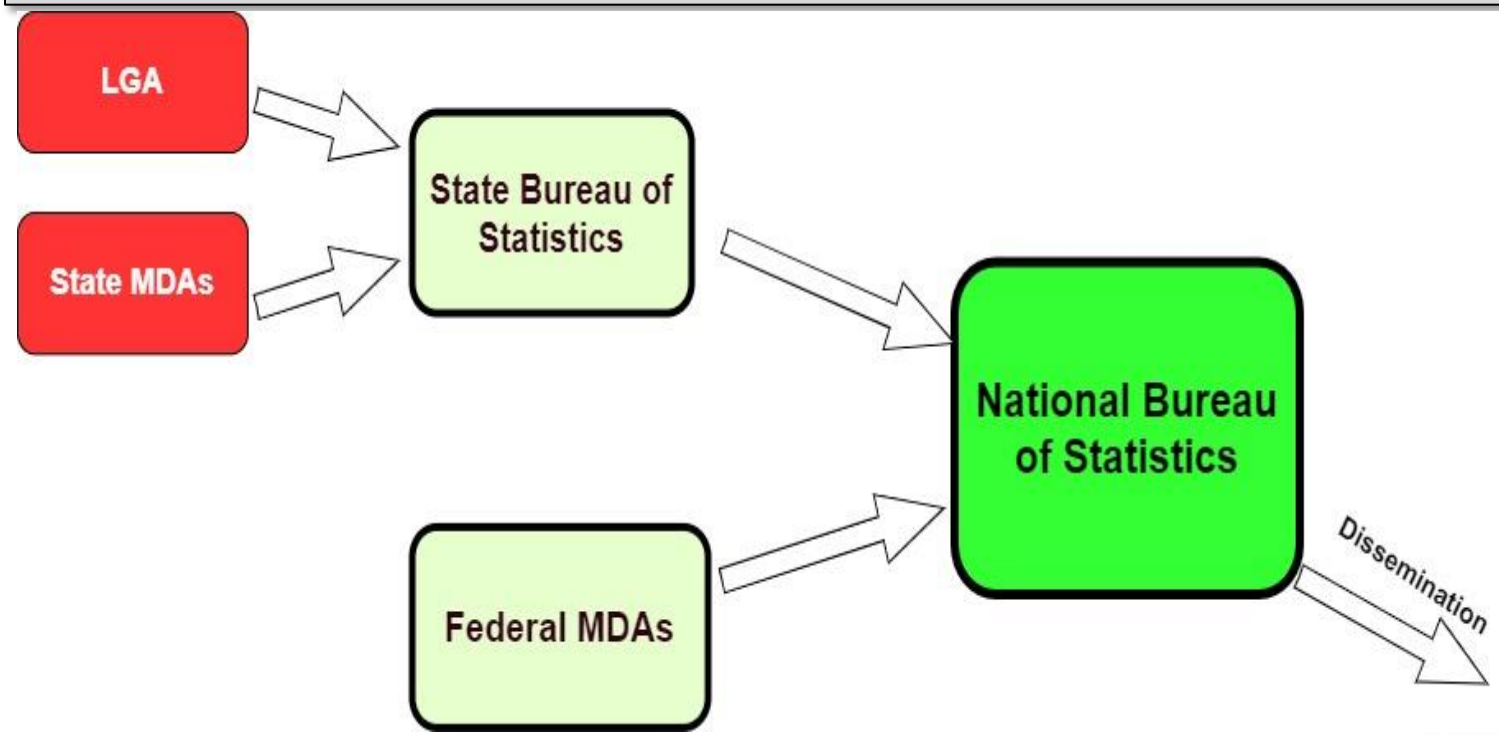
Methodological Soundness

Accuracy and Reliability

Serviceability

Accessibility

Coordination, Networking, Data and Information Management and Flow



NBS should be a One-stop-shop for statistical data

As I Conclude

- Everybody is a key player in the quality of data disseminated in the country.
- A well-linked statistical system is an important tool for sustainable development in Nigeria.
- To have a well-linked statistical system, there is a need for adequate funding of our national statistical system
- A well funded national statistical system should display all statistical data online for effective and sustainable collaboration among all stakeholders

Prof. Akinwande Oluwole Babatunde Soyinka
